R22 ILLUSTRATED PARTS CATALOG

RTR 060 VOLUME II

Production Certificate Number 424WE

Type Certificate Number H10WE

Robinson Helicopter Company
2901 Airport Drive
Torrance, California 90505-6115
United States of America

Phone: (310) 539-0508
Fax: (310) 539-5198
Web: <https://robinsonheli.com>

OFFICE HOURS

Monday through Friday, 7:30 a.m. to 4:30 p.m., Pacific Time.
Lunch hour is 11:30 a.m. to 12:30 p.m.

HOLIDAYS

Please visit <https://robinsonheli.com> for a list of holidays and company shutdowns.

CUSTOMER SUPPORT AND SPARES ORDERS

Please visit <https://robinsonheli.com> for Customer Support contact information. Procure parts from any R22 Dealer or Service Center, or order directly from RHC Customer Service via email, fax, or phone.

PUBLICATIONS

Viewing RHC Maintenance Manuals (MMs) and Illustrated Parts Catalogs (IPCs) online at <https://robinsonheli.com> is recommended to ensure use of current data. Viewing MMs and IPCs offline via paper or digital download requires verification that the data is current. Refer to the online MM or IPC Revision Log for the list of current pages.

SUBSCRIPTION ORDER AND RENEWAL FORMS

Subscription order and renewal forms are located at <https://robinsonheli.com>.

WARRANTY INFORMATION

Helicopter and parts warranty information is located at <https://robinsonheli.com>.

COMMENTS:

CATALOG FEATURES

INTRODUCTION

The Illustrated Parts Catalog (IPC) is used in conjunction with the R22 Maintenance Manual (MM) to provide instructions for continued airworthiness. The IPC identifies parts, components, and detail parts that make up, and are required to support, the R22 helicopter. RHC uses a modified Air Transport Association (ATA) chapter structure to organize the various systems of the R22 Helicopter.

The catalog features:

1. A chapter list
2. A table of contents located in the front of the catalog
3. A table of contents at the front of each chapter
4. Alphabetical and numerical indexes located in the appendices at the back of the catalog

PART DESIGNATION

Robinson parts are designated with a part number prefix "A", "B", "C", etc., followed by three digits and a dash number, such as A101-1. Robinson special tools are designated with a part number prefix "MT". For standard hardware items such as bolts, nuts, screws, etc., "AN", "MS", and "NAS" part numbers are used. When a rivet length is not specified, length must be determined by the installer. In some instances, vendor part numbers are also used.

PARTS AVAILABILITY

"X" indicates part is available as a separate spares item.

"O" indicates part is no longer available, or only available as part of a higher assembly.

CHANGE BARS

Change bars are located on the outside edge of the page, and indicate new or revised data. Change bars between lines indicate data was removed, and parts renumbered as required. Change bars on figure pages indicate changes to the figure somewhere across the page in the area of the change bar. A change bar encompassing the figure title and item 1 indicates the figure number changed. Change bars that are the full length of the page indicate all new data, usually a new figure and parts data.

ABBREVIATIONS

Assy – assembly	max – maximum	rev. – Revision
A/R – as required	min – minimum	RH – right hand
A.O.G. – Aircraft On Ground	MM – Maintenance Manual	RHC – Robinson Helicopter Company
Cont'd – continued	MR – main rotor	§ – Section
Incl – includes	OH/EXCH – Overhaul/Exchange	TR – Tail Rotor
LH – left hand	Ref – Part(s) "referenced" for clarity	TRDS – Tail Rotor Drive Shaft

ORDERING AND SHIPPING

All orders must include instructions for shipping. All parts or components shipped to RHC must include a signed Component Return/Authorization Form. Return shipments must be paid for by the dealer or distributor. NOTE: Handling fees will be applied to all orders received which are under \$1,000.00. Orders shipped on an A.O.G. basis (24 hours domestic, 48 hours foreign) will be assessed additional charges.

WARRANTY

RHC will apply the same 1-year or 1000-hour RHC limited warranty to all parts and components purchased from RHC.

RETURNS

No unused parts may be returned to RHC for credit if the parts show any indication whatsoever of use or damage, or if the cost of the individual part was less than \$25 (U.S.). Parts returned within 30 days of purchase will be assessed a 20% restocking fee. No parts may be returned after 30 days without prior RHC approval. Any parts approved for return after 30 days will be assessed a 50% restocking fee.

CATALOG FEATURES (Cont'd)**REVISIONS**

Viewing the R22 Illustrated Parts Catalog (IPC) online at www.robinsonheli.com is recommended to ensure use of current data. Viewing the IPC offline via paper or digital download requires verification that the data is current. Refer to the online IPC Revision Log (Chapter 100) for the list of current pages.

HOW TO USE THE ILLUSTRATED PARTS CATALOG

Below are search protocols, based on the information known:

If searching by part number:

1. Digital Catalog:

The IPC is available online in digital PDF format.

- a. Open the chapter PDF or the full book PDF in the PDF reader of your choice.
- b. In your PDF reader open a "search" or "find" window and type in the p/n you are looking for.
- c. All instances of that p/n should be found, and you can move through the list until you find the information you are looking for.

2. Paper Catalog:

- a. Go to Appendix B, the Numerical Index, and locate the part number.
- b. You will find where that part number is called out in the Illustrated Parts Catalog (IPC).
The Numerical Index is divided into six sections, RHC part numbers, RHC "KI" (kit) numbers, RHC "MT" (tool) numbers, RHC "R" numbers (specialty parts), vendor part numbers, and standard hardware part numbers.
Note: Vendor part numbers are sorted by column from left to right numerically, then alphabetically, and all hyphens are ignored for sorting purposes, i.e. "75-900-2026" comes before "760", and "760" comes before "A15A".
- c. Note the page(s) and item number(s) listed.

If searching by part name:

1. Digital Catalog:

The IPC is available online in digital PDF format.

- a. Open the chapter PDF or the full book PDF in the PDF reader of your choice.
- b. In your PDF reader open a "search" or "find" window and type the part name you are looking for.
- c. All instances of that part name should be found, and you can move through the list until you find the information you are looking for.

2. Paper Catalog:

- a. Go to Appendix A, the Alphabetical Index, and look for the name of the part, component, or system you are looking for.
- b. You may find listings under multiple names for some components. Only the most common parts, components, and systems are listed in the Alphabetical Index.
- c. Note the page(s) and item number(s) listed.

If searching by system:

1. Go to the Chapter List on page iii, and determine the appropriate chapter.
2. Go to the Table of Contents, or the Chapter Table of Contents, and further determine from the Figure titles the illustration where the part might logically appear.
3. Go to the Figure number and locate the part and its item number on the illustration.
4. Go to the item number noted in the parts list and verify it is the part you are looking for by reading the description. Be aware of any asterisks and the notes they reference, to verify the part is the current part for your aircraft. Find the part number in the illustration for location and associated hardware and/or components.

PART INTERCHANGEABILITY

The following parts are interchangeable. Unless noted otherwise, whenever one part is referred to in this catalog, its substitute part is also permitted.

<u>PART:</u>	<u>INTERCHANGEABLE WITH:</u>
